

Progress Report 1

AI Nutritionist - Health academy website

Date	Hours	Task	Work Done
9/29/2025	1	Meeting with Olga	Our client had some requirement change for the project and she has another team working for her. Client want was to focus on the WordPress site mostly i.e. Change the UI, delete plug-ins and adding a quiz feature.
10/02/2025	3	WordPress website exploration	As I've very little experience with WordPress, I'm reading through the WordPress official document for more details. As I need to delete some plug-ins, I'm trying to understand the dependencies of 52 plug-ins currently present in the website
10/03/2025	2	Discussion with Nick	Discussed our goals and approach for the project after the requirement changes. We shared ideas and resources we have to start working on WordPress. It is a bit complicated because we're working on a live website.
10/05/2025	2	Next.js demo	Going through the resources about Next.js online. Taking notes and watching videos to implement Next.js as headless cms on top of the existing wordpress site
10/07/2025	0.5	Creating a demo WordPress site to experiment.	Creating a demo site to know more about the changes we're about to make.
